The recent Expression of Interest period for the Union Steamship Building generated two submissions. Both submissions proposed restoration and development to support commercial, part public, and residential use.

Council assessed both expressions of interest and met with both proponents. Following a Council Meeting, Council determined a preferred proponent and will now commence negotiations with that proponent. The proposal involves the sale of the Union Steamship Building to the proponent and development of the building with a partial public space. Following negotiations, the final proposal will be provided publicly and Council will consider terms and conditions of the arrangement.
